Applications

- Leaf & Debris Removal
- Litter Removal

The optional on-board hose kit provides access to hard-to-reach places and tight quarters.

Collected debris is channeled through steel impellers, chopped and deposited in the debris bag.

Comfortable and easy to use, with many operator-friendly features to enhance performance.

KD Performance With Front-Wheel Drive.

From leaves to cans to glass bottles, the KD512SP Estate model vacuum takes it all in stride. Collected debris is channeled through steel impellers for chopping to reduce volume before being deposited in the debris bag. This vacuum is designed with many operator-friendly features, like oversize ball bearing wheels for easy movement on uneven terrain, a durable hard-bottom felt bag with a large 8-bushel capacity, and easy on-the-fly height adjustment. An available "on-board" hose kit option affords the KD512SP Estate model vacuum the ultimate in versatility, allowing easy access to those hard-to-reach places under shrubs and trees, around gardens and flower beds, and in tight quarters.
